PUPIL ASSET INTEGRATION GUIDE

A third party application used by your school uses Wonde to access school data from a number of MIS providers such as Pupil Asset. As your school is yet to have the integration setup with Wonde the following steps need to be completed.

1. Log into Pupil Asset as an administrator.
2. Navigate to Admin > Export > External API Integration

The screenshot shows the Pupil Asset Admin interface. The top navigation bar includes 'Home', 'Pupils', 'Results', 'Analysis', 'Messaging', 'Office', 'Admin', 'Website', and 'Help'. Below this, a secondary navigation bar includes 'School Options', 'Staff', 'Import', 'Export', 'Advanced', and 'Access Control'. The main content area is titled 'Taking data from Pupil Asset' and includes a list of providers with instructions on how to authorize access. The 'Export' menu is open, showing options for 'Export Wizard', 'CTF format', and 'CSV format'. The 'External API integration' link is highlighted.

3. Find Wonde in the list of providers and click 'Authorise'.

The screenshot shows the Wonde provider entry in the Pupil Asset interface. The provider name is 'wonde' with a logo. The website URL is 'https://wonde.com/'. There is a red 'Authorise' button. To the right, a list of data types is shown with checkboxes, all of which are checked: School Info, Students, Behaviour, Read Attendance, Write Attendance, Contacts, Staff, Groups, Photos, and Live School.

4. Please send the schoolRef, which is located in 'STEP 2' at the top of the page (eg A1), your School Name, DfE number and Postcode to support@wonde.com or give us a call on 01638 779144.
5. The Wonde team will then complete the process and confirm the connection is working successfully.
