Pupil Asset integration guide

A third party application used by your school uses Wonde to access school data from a number of MIS providers such as Pupil Asset. As your school is yet to have the integration setup with Wonde the following steps need to be completed.

1. Log into Pupil Asset as an **'Administrator'**
2. Navigate to **Admin > Export > External API Integration**

The screenshot shows the Pupil Asset interface. The top navigation bar includes 'Home', 'Pupils', 'Results', 'Analysis', 'Messaging', 'Office', 'Admin', 'Website', and 'Help'. Below this is a secondary navigation bar with 'School Options', 'Staff', 'Import', 'Export', 'Advanced', and 'Access Control'. The main content area is titled 'Taking data from Pupil Asset' and contains instructions for connecting providers. A table is partially visible with columns for 'Provider', 'Website', and 'Actions/Notes'.

3. Find 'Wonde' on the list of providers and click 'Authorise'

4. Once authorised, this will now allow the school to approve the sub-groups of access for Wonde.

Important Info: These will default to selected and we would advise that you leave them ticked so this works with all applications.

Note: If you wish, you are able to deselect the options that you do not need but please ensure that **schoolInfo** and **liveSchool** must be ticked as we will always need this. Press F5 on this page, in order to ensure that the authorisation has been successfully submitted.

5. Please enter the **SchoolRef** (This is located at the top right corner of the authorisation page and is normally alphanumeric e.g. A1234) and **Pupil Asset Domain** in our [Google form](#).
Alternatively you can send it to us via secure methods. If you have any issue please contact Wonde at support@wonde.com or give us a call on 1800 064 506.
6. The Wonde team will then complete the process and confirm the connection is working successfully.
